Product Description

Argo XTV Aurora 950 R

ADDED PROTECTION ADDS PEACE OF MIND.

The 2024 Aurora 950 R adds even more safety with its certified ROPS for outdoor enthusiasts exploring difficult terrain. Aurora is the premium XTV platform for ARGO, and this machine is equipped with a massive 950 V-Twin engine to give you the high-performance power to go far away from it all. And with its Instant Torque Clutch (ITC) technology and the Admiral transmission with ARGO Progressive Steering (APS), it will feel like the easy, stress-free vacation you deserve. And desire.

Capable of water fording with ROPS with two passengers, the journey far exceeds the destination when you are driving the Aurora 950 R. Take it all in and take advantage of the time you get with the ones who share your love of riding. Block off your calendar for a day or a week, and go hit the trails safely.
