Product Description

Argo XTV Aurora 950 Huntmaster

BIG NEEDS TO GET BIGGER THIS YEAR.

If your big-game trophy wall could talk it would say, “Go where others can’t.” This knowledgeable piece of sheetrock is talking about the woods-wandering, range-crossing, swamp-surfing 2024 Aurora 950 HuntMaster. This amphibious XTV was built to go anywhere and eager to help you find a bigger and better story above your mantle. The Huntmaster is ready to roll.

You’ll have no problem getting to the spot many have tried to reach with the massive 950 V-Twin engine powering this big-game ARGO stalking machine. Plus, with our reliable Admiral transmission with ARGO Progressive Steering (APS), 25" low-pressure tires and TrueTimber® Prairie camo, you'll have all the makings for bigger memories you'll never ever forget. It's going to be a great year.
